Research(ers') Perspective

Improved and „translated" understanding

time

To be discussed

1. How does the tool **bridge research – standard – industry perspectives**?

2. How can we **integrate** the different approaches?
   How to avoid fragmentation (= fail)?

3. What is **missing**? (crtitical models, statistics,….?)

4. What do we expect from **commercial competitors**?
   How to deal with this?

5. ….

Hazard Assessment Toolkit, RPW, Washington DC,10.11.2014   T. Jordan
